

Electric Motored AF Lens HD CVI camera

In general, it's an awkward issue to adjust a VF lens camera to make it show you the best image quality. To solve this inconvenience we released a new series HD CVI camera. It can support adjusting the camera Lens zoom and control the OSD menu via DVR directly by coaxial-cable.(No need the tail button cable)

(e.g. : Dahua CVI DVR)

Zoom in and zoom out

1. Connect the camera to DVR BNC port you can see the camera image;
2. Right click and select then DVR PTZ menu, then you can press the Zoom (+ -) to adjust the lens . When you release the Zoom button , the camera will focus automatically.

OSD menu control

1. Click the orange triangle;

2. Then click the **Enter Menu** button;

3. Then click the **Enter** button to show the OSD menu;

Note :

- UP/Down -> move cursor up and down
- Left/Right-> Change the selected value
